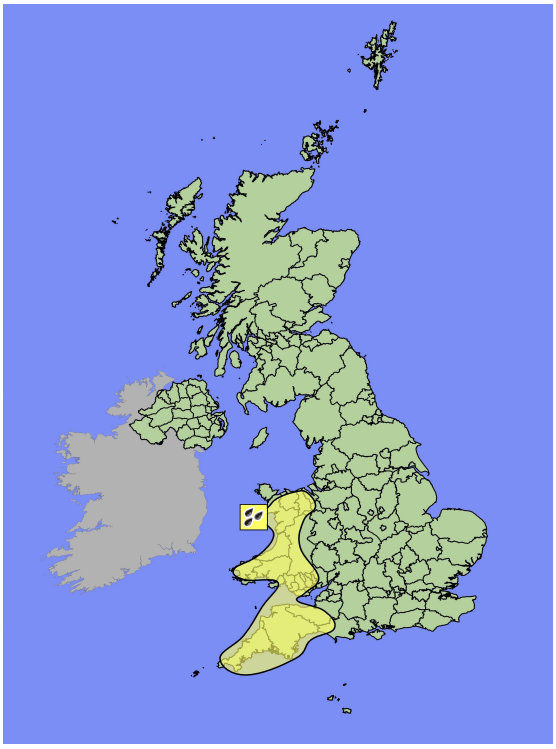
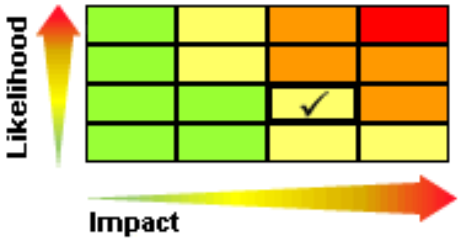
National Severe Weather Warning Service





Chief Forecasters Assessment
A rapidly deepening area of low pressure will move northeast across the UK and into the northern North Sea during Sunday night and Monday. Associated frontal systems will bring another spell of wet weather, accompanied by generally very windy conditions with gales in places. The heaviest and most persistent rain is expected over higher ground of the west of England and Wales. As much as 40 mm may fall over the Moors of the southwest of England, with 60 to 80 mm over Welsh Hills and locally up to 100 mm over Snowdonia.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **18:00 on Sun, 30th Dec 2012** until **12:00 on Mon, 31st Dec 2012**

A spell of wet and very windy weather will affect the whole of the UK later Sunday and at first in Monday. Western regions can then expect a period of persistent heavy rain over high ground and the public should be aware of possible disruption, particularly to travel, and also of the risk of localised flooding.
